4/19 Starfleet Team Meeting

Agenda
- review design
  - lend requests
  - return requests
  - report requests
  - trustworthiness
  - MIT only
- feedback
  - is project large/ambitious enough?
- changes to make?
- possible additions?
  - internal messaging system + emails
  - sell and borrow items as well

Meeting minutes

- Validation with mit email - send them an email and have a confirmation email
- How to deal with people denying return requests - based on trust and ratings
- Calendar implementation?
  - Haven't thought about
  - Add features that might not be implemented
- What we plan to implement in a week
  - Make lend/return requests
  - Don't be too ambitious, MVP design should be what we implement (lose points if don't do it all)
  - Make sure to have wireframe of design
  - Should be well polished
- Have challenges/risks and how we'll solve them
- Size of project
  - reasonable
  - if we can add features, go for it, but don't have to
